Objective

Seeking a position to use and apply acquired knowledge from previous roles and relevant coursework. A technically and creatively inclined individual excited to apply skills and experience that will optimize your business operations.

EDUCATION

Kalamazoo Valley Community College - Kalamazoo, MI

Associates of Applied Sciences, Occupational Technical Studies   -   Honors list (3.67 gpa)   *2022 - 2024*
   - Web based technology emphasis

Ivy Technological University - Bloomington, IN

Associates of Applied Sciences   *Transferred*

PROFESSIONAL EXPERIENCE

Green Bay Packaging, Kalamazoo, MI   *Present*

IT Intern
   - Worked on basic networking and security practices including the assignment of LAPs, deploying new hardware, and replacing or creating new network cables
   - Worked in a ticketing system to respond to technology based issues of other employees at the facility I worked at as well as fixing hardware such as computers and laptops
   - Communicated with other IT coordinators at different branches to help them fix their local issues.
   - Created data visualizations through PowerBI using preexisting data to help make data driven decisions..

BusStop Computing, Mattawan, MI   *2022 - 2023*

Web Developer / SEO
   - Remaking web pages using best practices for both user experience and SEO. This included, but was not limited to, things like changing the homepage to better use space, modernize the feel of the landing page, and to increase user retention.
   - Assisted the main SEO team with making changes, based on their feedback, to the front end in order to fulfill client needs.
   - Working with common place SEO auditing tools like Google Search console and Screaming frog.
